Once again, big corporate media with it's high paid lobbyists are trying to stop competition from satellite radio. I had stopped listening to radio for three reasons. 1) with consolidation in the industry it was all the same crap on each station. 2) I lost my dance station in Chicago for yet the fifth Spanish station, but a bigger company bought a little radio station. 3) When a station was providing traffic and weather every ten minutes, if there was a sports event going on that they would broadcast, there when the traffic and weather information. Since getting my new car with XM satellite radio I have never looked back. Maybe if standard radio had more diversity I would listen. But for now it is well worth the monthly fee to get XM radio. Also, how can the NAB dictate to me what I can hear on a service I pay for. They are just trying to control the media.

I strongly urge the FCC to reject the NAB's petition 04-160.

Thank You
Ray Anderson
